Dick,

Yes, Flaming Gorge is the nearest TNW. For this project the upper limits of the TNW have been defined where the Blacks Fork enters the reservoir. That has been defined at a specific elevation, but I am having trouble locating that reference. Let me know if you think I should dig that up and I can get it from Tom on Monday.

I received your message and attached is a signed copy of the NOV letter to Mr. Johnson.

Take care,
Kevin

Dick,

I have attached an image from the mapping interface of our ORM database that displays the projects as yellow dots, lines, or polygons. Mr. Johnson's number is highlighted on the map. There are two projects that required ARMY authorization on the Black's Fork River upstream of where Sixmile Creek flows in to it.

2012-01174 is a series of Uinta County Road & Bridge Projects
1997-40344 is a pipeline project across the Black's Fork River
1987-40001 is some kind of project that did not require a permit. I was unable to decipher why that was from our database.

There are a lot of projects in an around Mountain View - take a look at the attached map and let me know if there are any other files you would like some information on.

Wendy, Here is the e-mail the Corps sent with the attached document showing the permit actions that occurred around Mr. Johnson's site. I called the Corps and asked for a copy of the Corp's notice of violation. Also here are the distances.

The site connection to a TNW is along Nine Mile Creek, which I believe is a Relatively Permanent Water (RPW) is 0.5 miles to Black Fork River which flows continuously for 125 miles to the Flame Gorge River a TNW.
